

PEDRO J. ECHEVERRIA

Pedro J. Echeverría Agronomist Engineer obtained at U.P.N.A University, Occupational Safety and Health Senior Technician, and Master in Environmental Management Engineering. He has more than 15 years of experience in the agro alimentary sector, basically devoted to the technical, environmental and R&D area.

Between 1999 and 2007 he worked in different projects related to enterprise management, always within the scope of CONSEBRO (enterprise Association of Agro-alimentary Industries that has a unit of services of enterprise management) and since 2008, he is Technical Director of the company TRASA. The aim of the company is the treatment and valorization of sub-products from the agro food sector. During these last years, he participated, in several R&D projects in collaboration with other companies, technological centers and universities related to the remainders/agro-alimentary by-products and their possibilities of valorisation (BISOSTAD, CARBIO, VALBIO, VALSOST+).
